

ORIPLAST REFLEX

Ultra-reflective waterproofing coating

What it is

Oriplast Reflex is specifically designed and developed to reflect up to 90% of UV rays. It is a water based acrylic resin coating, filled with special aggregates, non-hazardous for environment and health. It is a one component product and it is ready to use.

Application fields

Oriplast Reflex is a waterproofing coating for flat roof, pitched roof and vertical walls. It guarantees protection and reflectance at the same. Oriplast Reflex surfaces stay cooler in hot weather, greatly reducing thermal shocks and heat penetration.

How to apply it

Oriplast Reflex is a one component liquid product that does not need to be mixed or require particular preparation. It can be applied by roll or brush in two coats. For big surfaces it can be applied by airless machine.

Oriplast Reflex benefits

- It reflects UV rays: it avoids over heating of the surface and it contributes to energy saving
- Waterproofing and protection of the surfaces
- Ideal solutions to protect/restore bitumen membranes
- Easy to apply
- Eco friendly: LEED certified, non toxic in liquid or cured form
